Questions 31–37

Complete the summary below.

Write **NO MORE THAN TWO WORDS** for each answer.

Every day the human body is fighting off **31** by destructive pathogens. A person in good health has natural protection in the form of an immune system which works best against familiar micro-organisms which may have been encountered during a previous **32** or passed on by the mother before or after birth.

Vaccination is a way to cause **33** immunisation by introducing a small amount of pathogen into the body — just enough for the body’s **34** to react by making antibodies. Passive immunisation can be used as a way of treating someone who is already sick. Proteins from animal **35** are introduced into the patient to give him the necessary antibodies to fight the disease.

Dr. Edward Jenner observed that people who had suffered and recovered from a serious disease called smallpox did not get it again. He also noted that victims of a milder disease, cowpox, which they caught from **36**, were immune to smallpox. He carried out a successful **37** by deliberately giving a child cowpox in order to make him immune to smallpox.
